

OMKAR JANARDAN SAWANT

7517935308 | osomkar444@gmail.com | [LinkedIn](#) | [GitHub](#) | Kalyan, Maharashtra, India - 421306

SUMMARY

Software Developer skilled in React.js, React Native, Node.js, Express.js, MongoDB, Firebase, and REST APIs. Experienced in developing scalable web and mobile applications through internship and project work. Strong problem-solving abilities with knowledge of Data Structures, Algorithms, DBMS, and OOP.

EDUCATION

B.Tech in Information Technology

July 2022 – May 2026

Ramrao Adik Institute of Technology, D.Y. Patil Deemed to be University, Navi Mumbai

CGPA: 7.98 / 10

Coursework: DSA, DBMS, OS, CN, Object-Oriented Programming (OOP), Software Engineering, Mobile Application Development

EXPERIENCE

Software Developer Intern | [Durwankur AI Labs Pvt. Ltd.](#) | Navi Mumbai | Dec 2025 – May 2026

- Developed production-grade web and mobile application features using React.js, React Native, Node.js, and TypeScript in an Agile environment.
- Built reusable UI components and integrated RESTful APIs to enable seamless communication between frontend and backend systems.
- Implemented Firebase Authentication and Firestore-based real-time data synchronization while optimizing application performance and user experience.

PROJECTS

SafeMaha — Food Safety Complaint & Inspection Management Platform [\[GitHub\]](#)

React Native (Expo), FastAPI, PostgreSQL, SQLAlchemy, Supabase Storage, JWT Authentication, REST APIs / May 2026

- Engineered a full-stack citizen grievance platform for reporting food safety violations with image-based evidence submission and real-time complaint tracking.
- Implemented role-based access control for Citizens, FDA Officers, and Administrators, automating complaint assignment, inspection tracking, and case resolution workflows.
- Developed secure REST APIs using FastAPI, PostgreSQL, SQLAlchemy, JWT Authentication, and Supabase Storage, enabling scalable data management and evidence handling.

AirSense Plus — AQI Monitor [\[GitHub\]](#)

React Native, Expo, REST APIs, Geospatial Services | Nov 2025

- Built a cross-platform mobile application using React Native and REST APIs to deliver real-time air quality monitoring and pollutant analytics.
- Implemented geospatial services and location-based health alerts, providing personalized environmental insights through an intuitive color-coded interface.
- Designed responsive mobile screens and optimized API integration to ensure accurate data visualization and seamless performance across Android and iOS.

QuickOrder — QR-Based Restaurant SaaS [\[GitHub\]](#)

React.js, Node.js, Express.js, MongoDB, Vite | Aug 2025

- Engineered a full-stack SaaS platform for restaurants, enabling QR-based digital ordering and streamlined customer dining experiences.
- Developed RESTful APIs and a real-time order management dashboard to support live order tracking and kitchen operations.
- Architected scalable MongoDB schemas for menu management, order processing, and historical data storage, ensuring reliable application performance.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python

Frontend / Mobile: React.js, React Native, Expo, HTML5, CSS3, Responsive Design

Backend & Databases: Node.js, Express.js, FastAPI, REST APIs, API Integration, MongoDB, PostgreSQL, SQLite, Firebase Firestore

Authentication & Security: JWT Authentication, Firebase Authentication, Role-Based Access Control (RBAC)

Tools: Git, GitHub, Linux, VS Code, Agile/Scrum
